

## EASYBUILD FULL BUILD INCLUSIONS AND EXCLUSIONS

### Full Build Pricing Information

All Full Build prices shown on each design's individual page on our website are approximate and should be used as a guide to the cost of having a completed EasyBuild home constructed on your site.

Full Build Prices vary between regions, and can change significantly depending on the location and condition of your section, what services you may need to install, and local pricing conditions.

This inclusion list relates to the Full Build Prices shown on our website. Talk to your EasyBuild Preferred Builder or Contact Us for a comprehensive quote that takes your site requirements and chosen specifications into consideration.

All prices displayed are based on our Standard House Pack, built on concrete slab foundations with Duragroove primary cladding and Nuline Plus weatherboard features.

Alternative cladding variations, timber floor packs (for sites requiring timber pile foundations), seaspray zone requirements or other amendments may incur additional costs.

The price excludes materials for decking and verandahs, which are an optional extra.

Please note that to meet Code Compliance standards, houses on timber pile foundations may be required to have decking or suitable steps outside all external doors.

All prices stated include GST and are subject to change.

### Full Build Inclusions

Plans	Customised set of plans including site specific setout, site information and preparation of your building consent documentation. The fee charged by your local Building Consent Authority for assessing your application is not included. All plans are based on very high wind zone, and cover earthquake zones 1 to 3 (soil classes A to E).
Master Build Guarantee	10-year Master Build guarantee, as confirmed with your builder.
Delivery	Delivery costs vary depending on your location and which island you are located on, and range from \$3,450 to \$11,500. Deliveries to remote or difficult to reach areas or where the building site is difficult to access may incur additional costs. Our Full Build price includes an allowance of \$3,450.
Foundations	House to be built on a RibRaft or concrete slab foundation in Zones 1-4 (North Island and Upper South Island). Our Full Build price includes a PC Sum allowance applicable for a level site with clear access, to NZ Building Code 3604 standard on good ground conditions.

	For houses in Zones 5 and 6 (Lower South Island only), there are significant additional insulation requirements for concrete slabs based on the 1 May 2023 Updates to the NZ Building Code. Please talk to us for more information. In these Zones, a house built on a timber pile foundation will likely be the most cost-effective option.
Hardware	All required hardware for construction of components within the EasyBuild House Pack.
Floor Pack – for Concrete Slab Build	Brackets, packers and required hardware.
Framing	Pre-cut structural and internal framing. All timber is treated to the required standards for each purpose.
Insulation	Expol Black R1.8 underfloor insulation, for houses on pile foundations only, in Zones 1-4. Houses in Zones 5-6 (Lower South Island) require additional thickness.  Wall insulation 90mm R2.8, pre-installed in exterior panels.  Knauf Earthwool R5.0 Skillion Roof Insulation.
Exterior Panels	Pre-built exterior panels, fully lined and insulated with pre-installed windows and external doors. Exterior panels include a rigid air barrier and materials for a ventilated cavity are provided, making your home stronger and more resistant to water ingress. Conduits in the panels allow for easy wiring.
Windows and Exterior Doors	Double Glazed Windows, thermally broken and argon filled with low-E glass, pre-installed into exterior panels.  Double Glazed Doors, thermally broken and argon filled with low-E glass, pre-installed into exterior panels.  Double Glazed Sliding Doors, thermally broken and argon filled with low-E glass.  Pre-installed aluminium TG&V front door. Available in Matte Flaxpod or Matte Sandstone Grey.  Joinery for windows, doors and sliding doors available in Silver Pearl or Flaxpod.
Ceiling Sheets	Triboard ceiling sheets.
Roof Ventilation	Roof ventilation material to be installed along each purlin, allowing increased airflow within the roof cavity, and further protecting your home from moisture.
Roofing	Colorsteel Maxam pre-painted corrugated roofing, including ridge flashing, barge flashings and fixings. Available in Flaxpod or Sandstone Grey.
Spouting	Marley Classic white spouting and downpipes (Classic models) or Marley Typhoon Flaxblack or White spouting and downpipes (Contemporary models).
Soffit lining	Fibrous cement sheet soffit and jointers.
Fascia	Pre primed finger jointed pine fascia.
Cladding	Duragroove Smooth with Nuline Plus weatherboard features. Other cladding choices are available, however costs will vary.
Cavity Battens	Treated timber cavity battens, allowing an extra layer of protection between your exterior panels and weatherboard, further protecting your home from moisture.
